EMPLOYMENT HISTORY

Business & Integration Arch Specialist (System Analyst)
Accenture (Thailand) | 2020 - Current

- Worked on multiple new features for Thailand's leading mobile banking application used nationwide including PromptPay International, mobile top-up, and NDID Bank Statement.
- Led team members in estimating the effort required, designing, and planning the architecture and system design of new features for both front-end and back-end development then implementing these solutions into technical documentation based on business requirements and any technical constraints
- Gather, explain and negotiate technical requirements and constraints to key stakeholders both internally and externally
- Collaborate with cross-functional teams and clients to retrieve the necessary information, and remove any blockers. Provide support for SIT and UAT sessions to relevant stakeholders including developers and testers.

Web Coordinator
Bangkok City Suite | 2019 | Part-time project

- Coordinated with an outsourced web designer company to completely renovate the hotel's website (https://www.bangkoksuite.com/)

Full-Stack Web Developer
ReadyPlanet TravelTech | 2017 - 2018

- Planned and created a cloud-based invoice management system for hotels and resorts in Thailand. Allowing over 200 clients to send invoices to customers with ease (https://traveltech.readyplanet.com/instant-billings/).
- Added new features including implementing Google Analytics, and designing the availability chart, and maintaining the company's proprietary booking engine (https://traveltech.readyplanet.com/hotel-booking-engine/)
